

INHERENT GROUP ESG POLICY

I. MISSION STATEMENT & ESG COMMITMENT

Inherent Group believes that businesses that incorporate material sustainability factors into their strategy, operations, and culture will outperform over the long-term. Furthermore, we believe that businesses are uniquely positioned to address environmental and social challenges through product innovation, operational excellence and sustainability advocacy.

Our principal duty is to act in the best interest of our investors. Our mission is to compound capital at superior rates of return by investing in core holdings that we believe are financially, environmentally and socially sustainable. Through our engagement with selected companies, we aim to inspire business owners and managers to incorporate sustainability factors into their decision-making, and to encourage business more broadly to address environmental and social challenges.

Our Values:

- **Purpose.** Refer to our mission as our north star. Patiently but urgently execute our mission.
- **Discipline.** Stick to our strategy, strike zone, and investment process. Think like an owner.
- **Diversity.** Seek diverse backgrounds and perspectives in our hiring and research processes.
- **Candor.** Take and give honest, constructive feedback. Be open about what we do and don't know.
- **Sustainability.** Reduce our environmental impact. Recognize our responsibility to give back to the community.
- **Joy.** Create a positive, collaborative environment where people enjoy coming to work and pursuing our mission.

Our Approach:

Inherent Group integrates environmental, social, and governance (ESG) considerations into our investment process for core holdings, using ESG as a tool to enhance the sourcing of investment ideas, the underwriting of risk-reward, and the efficacy our engagement with selected portfolio companies.¹ We believe that this approach helps us build a differentiated investment portfolio, deepens our fundamental investment analysis, and increases our understanding of a company's culture and incentive alignment.

Our Commitment:

Inherent Group is a signatory to the UN Principles for Responsible Investment (UN PRI) and a member of the PRI Reference Group on Corporate Reporting.

Our investment philosophy for core positions is aligned with the six UN PRI Principles:

- We incorporate ESG issues into investment analysis and decision-making processes.
- We are active owners and incorporate ESG issues into our ownership policies and practices.
- We seek appropriate disclosure on ESG issues by the entities in which we invest.
- We promote acceptance and implementation of the Principles within the investment industry.
- We work together to enhance our effectiveness in implementing the Principles.
- We report on our activities and progress towards implementing the Principles.

Inherent Group is a certified B Corporation

¹ Inherent generally regards core positions to be those held in single-corporate-issuer equity or fixed income instruments where the absolute value of the position size for such issuer is at least 2% of NAV of the applicable fund (for funds open to outside investors).

As a B Corporation, we have formally committed to consider our firm’s impact on a broad range of stakeholders—including our investors, the local community, the environment, and employees—and to maximize our positive impact on society as a whole. We completed a comprehensive evaluation of our operations and business impact. The firm is subject to physical site reviews and, every three years, full recertification. The company’s B Impact Report is available online at bcorporation.net/directory/inherent-group. We decided to become a B Corp to lend support to the growing global movement of more than 3,000 B Corps that focus on more than just financial returns to their owners and because we wanted to undertake the same sort of policy-setting, operational, and business improvements that we encourage our portfolio companies to pursue.

Inherent Group is a founding signatory of the Net Zero Asset Managers initiative (“NZAM”)

NZAM currently represents over 273 signatories managing over \$61T in assets.² In our first target submission, we have committed to reduce the attributed CO₂-equivalent (“CO₂e”) emissions per invested dollar for covered AUM (a) by 50% by 2030 versus a 2019 baseline and (b) to net zero by 2040. Covered AUM is initially 74% of the firm’s AUM, and our intent is to increase this to 100% in due course. Our plan is consistent with the goal of the Paris Agreement to limit global warming to 1.5 °C, which will require aggressive action by companies, investors, and governments globally. As the scope of various regional and national CO₂e compliance regimes expands globally, more companies adopt Paris-aligned net zero targets, and CO₂e allowances and voluntary offsets increase in price, we believe that even greater attention to the CO₂e footprint of our portfolio will contribute to better investment performance. We have already made significant progress towards our targets. The firm’s first target submission is available online at <https://www.netzeroassetmanagers.org/NZAM-Progress-Report.pdf>. In addition, the firm is considering plans for various CO₂e-neutral investment products.

II. 360° ESG INTEGRATION

WHAT WE OWN

Long-term thinking is a critical feature of ESG-integrated investing, a core value at Inherent Group, and a key component of our investment approach. We seek to identify investable ESG themes that can affect asset prices for core positions over the next three to five years. These themes are often aligned with the United Nations Sustainable Development Goals (SDGs).

Investable SDGs we prioritize:

- Goal 3: Good Health and Well-Being
- Goal 4: Quality Education
- Goal 5: Gender Equality
- Goal 7: Affordable and Clean Energy
- Goal 9: Industry, Innovation, and Infrastructure
- Goal 11: Sustainable Cities and Communities
- Goal 13: Climate Action

HOW WE INVEST

ESG analysis is integrated in the investment process and conducted by the investment team in tandem with fundamental analysis for core positions. We use ESG as a tool, where relevant for core positions, in various ways, including:³

² Source: <https://www.netzeroassetmanagers.org/>.

³ The investment frameworks described herein illustrate how Inherent may implement the investment strategy and processes with respect to core positions (as defined above). No representation is made that such frameworks are implemented in all respects with regard to every position in any fund managed by Inherent; such frameworks are not applied to certain positions, including but not limited to smaller positions and certain hedges, indices, and baskets.

SOURCING	UNDERWRITING	ENGAGEMENT	REPORTING & MONITORING
Seek compelling investment opportunities aligned with SDGs	Identify financially material ESG risks & opportunities	ESG action plan focused on material sustainability issues	Track progress & hold management accountable
Identify investable dislocations & ESG engagement opportunities	Proprietary ESG analysis and culture assessment	Collaborate with management of selected companies on action plan goals	Report on progress to investors

Underwriting & Financial Materiality

We believe strong performance on financially material ESG factors can reduce a company's cost of capital, reduce the risk of unforeseen liabilities, and improve productivity. Our assessment of financial materiality is company-specific and determined by our proprietary research and tools. This assessment is informed by the industry-specific Sustainable Accounting Standards Board (SASB) standards where applicable.

As part of the underwriting process for core positions, we seek to analyze a company's performance on financially material ESG matters versus its peers.

For core positions, material ESG issues may include, but are not limited to:

- Pricing of externalities (e.g., carbon and water)
- Resource intensity
- Diversity, inclusion, and talent retention
- Workforce health and safety
- Alignment of financial incentives
- Board and management quality and accountability

Engagement

Inherent Group is an active stakeholder that seeks to engage with selected portfolio companies on ESG performance, reporting, and progress. We engage with selected companies with the goal of increasing the sustainability of the enterprise and improving financial results.

Engagement topics may include:

- Integration of material ESG considerations into business strategy and operations
- Development of Paris-aligned net zero CO2e strategies
- Externality pricing strategy (e.g., carbon, water, sulfur dioxide)
- Transparency and consistent reporting of material ESG targets and performance
- Executive compensation alignment
- Regulatory compliance
- Human capital management (e.g., talent retention and development, diversity and inclusion, health and safety, labor relations)
- Supply chain sustainability
- Climate risk and environmental impact
- Board structure, composition, and quality

Exclusions

When underwriting relevant core positions, Inherent Group attempts to understand the impact that currently un- or under-priced externalities may have on companies over time. Such analysis may include the effect of potential CO2e pricing in applicable jurisdictions. As a result, our risk-reward framework generally screens out long investments in industries with particularly high negative environmental or societal impacts including munitions, tobacco and recreational cannabis, gaming, extractive industries, etc. Furthermore, as reflected in our mission statement, we look to invest in core position companies that we believe are financially, environmentally, and socially sustainable. This typically entails consideration of a company's operations, products, and services on relevant stakeholders.

In addition, the firm has adopted the Paris Aligned Investment Initiative's policy on coal and tar sands, which reads as follows: "It is recommended that investors should not allocate additional capital to companies which are planning or constructing new thermal coal projects and associated infrastructure (power, mining) or taking forward new exploitation of tar sands. Where investors are existing shareholders or bondholders in such companies, they should use active and escalating engagement with the aim of ensuring no new thermal coal generation is developed and no further tar sand resources are exploited, and also that phase out of existing unabated capacity and activity is undertaken in line with net zero pathways. In advocating for these transition plans, investors should recognize the need for a just transition in countries or regions where there is significant economic dependence on thermal coal power or mining."⁴

Investment Stewardship

Proxy voting is both a fiduciary responsibility and an opportunity for dialogue with companies. We consider various strategic, operational, financial, and ESG matters, as applicable, when determining how to vote proxies.

We do not use external proxy advisors to guide our voting decisions. We independently determine how to vote each ballot measure. And, when we disagree with management's recommendations, we frequently engage with the company to explain our position.

All proxy voting recommendations are discussed with and approved by the firm's investment committee and votes are recorded in our in-house proxy tracker.

HOW WE OPERATE

Just as we engage with selected companies to improve their ESG performance and aim for net zero emissions in our investment portfolios through NZAM, we also endeavor to lead by example with best-in-class sustainability practices built into firm culture and operations. And we are always looking for ways to improve.

Environmental Impact

- We measure and offset the firm's operational carbon footprint via CO2e credits.
- We encourage a paperless office, with idea-sharing and meeting documents shared primarily electronically.
- We minimize our waste stream by recycling what we can and we strive to reduce single-use plastic in our office.
- We support select advocacy efforts. For example, we were signatories to the Global Statement to Governments on Climate Change (2018), the CEO letter on Investor Expectations on Climate Lobbying (2019), and the Investor Statement on Coronavirus (2020) and we wrote to the Department of Labor regarding the proposed DOL Employee Benefits Security Administration's rule, Financial Factors in Selecting Plan Investments (Regulatory Identifier Number 1210-AB95), which rule proposed prohibiting ERISA plans from investing in ESG vehicles (2020).

Diversity & Inclusion

We strive to build a culture of cognitive and cultural diversity that embraces difference and fosters inclusion. We believe that valuing diversity will lead to better investment and business outcomes.

Our commitments include:

- Seeking diverse backgrounds and viewpoints in our hiring and research processes
- Valuing and welcoming the insights of diverse groups; employees are not alienated or excluded because they don't fit a set of cultural norms
- Respectful communication between all employees regardless of title or level
- Prioritizing internship candidates from communities underrepresented in the financial services industry
- Advancing social enterprises in education, the environment, and sustainable investing through Inherent Foundation, which is supported by a portion of the carried interest generated by funds that we manage

Governance

Inherent Group's Investment Committee has direct responsibility and oversight of ESG integration including the application of this and related policies. We also maintain an external Advisory Council whose members provide guidance and feedback on sustainability best practices, trends, and opportunities.

In addition to our ESG policy, our work is guided by our Code of Ethics and Compliance Manual.

Broader Sustainability Ecosystem & Advocacy

Our sustainability advocacy work encompasses a number of efforts beyond investing as we aim to encourage business to address environmental and social challenges.

- Ceres: Board Member and Member, Investor Network
- NYU Stern Center for Sustainable Business: Member, CSB Advisors
- Interfaith Center on Corporate Responsibility (ICCR): Member
- CREO Syndicate: Member
- Business for Social Responsibility Sustainability Principles and Objectives Framework: Advisory Council Member

In addition, Inherent Foundation supports both non-profit organizations and high-impact for-profit companies that are improving educational opportunities and career pathways, benefiting the environment, and advancing the field of sustainable investing. Inherent Group employees are eligible for a 5x matching gift program by Inherent Foundation of up to \$15,000 per employee per year for mission-aligned non-profit organizations.
